

Natural Resources

Supporting the drive towards net zero, our insurance solutions are specifically designed for projects using renewable energy technologies such as hydro, solar, and wind power. Written by sector expert underwriters, our wordings provide robust, up-to-date protection for your clients' project exposures. DUAL is ready to serve your clients with cost effective, specialist solutions.

Key features

- Competitive premiums, A+ rated security
- Up to £150K target premium range
- £2,500 minimum premium
- Up to £50m capacity
- Deep sector and technical underwriting expertise
- Specialist wordings

What you can expect from DUAL

- Strength in local teams
- Responsive expert service
- Flexible and tailored package solutions

Risk appetite

We support a range of energy transition projects using diverse carbon-free and carbon-neutral technologies. We're looking to write risks for energy transition projects using:

- Proven technology
- A list of approved manufacturers and models based on past performance from original equipment manufacturers (OEM)
- Operator experience in line with OEM guidance, with sufficient preventative maintenance programmes and condition monitoring in place (and power generation their primary function)

Our specialist renewable energy coverage is based on our two core wordings, which can be customised around the client or project, worded to meet the differing needs of the following diverse technologies:

- Solar
- Wind
- Hydro
- Anaerobic digestion
- Biomass
- Short term operating reserve (STOR)
- Battery energy storage systems (BESS)

Long term benefits

Our breadth of products, longterm legacy, balanced portfolio in the market and excellent broker relationships allows us to offer flexible risk solutions at competitive rates.
